Stephen Fry's Surprise:
Snh! A one in a million Mother's Day gift

Stephen Fry, TV's most intelligent man, is doing something really smart for Mother's Day – adopting land. Unlike four million people buying flowers, Stephen's gift is unique & will stay green for much longer.

'My mother will love the idea of a gift that supports a conservation project here in England,' said Stephen. 'It's a mother's natural instinct to think of their children's future, so it's nice to say thank you in this way. This is quick & easy to do & will be fun to give her. Don't tell her because it's a surprise! Become my neighbour & support conservation in the Great Fen Project by adopting a hectare there, or in any of Healthy Planet's 77,000 protected parks around the world.'

WHILST THE KIDS
ARE LEARNING
THE SCHOOL IS EARNING!

MATHS CAN BE
CONFUSING FOR ADULTS...
BUT AT HEALTHY PLANET
IT TOTALLY ADDS UP FOR
THE PLANET **AND** FOR
YOUR SCHOOL !!

THE KIDS CHOOSE A PLOT OF
LAND THEY WANT TO
ADOPT WITH THEIR $\pounds 20$

THEY GIVE THEIR PERSONALISED
GREEN GIFT TO A LOVED ONE...

AND $\pounds 9$ GOES BACK TO YOUR SCHOOL

Schools and HP

Earth Day at Primary School Free Lesson Plans and Grants

April 22 is Earth Day, a day designed to increase awareness of the issues affecting the environment, to inspire positive actions in individuals and business, and to begin the process of reversing the current climate change trend.

"These easy-to-resource and easy-to-use lessons have been created for Y1-Y6 by teachers for teachers. They follow the inquiry-based learning structure that challenges children to answer relevant questions about their planet and really motivate them to show what they have learned in a practical real-world way. There are two one-hour lessons for each year group that are designed to cover a variety of objectives across the national curriculum. They are fun for both teachers and students and because the themes are real issues facing our children, they will stimulate discussion and you won't be able to stop your children from wanting to save our planet!" Liz Ryan, teacher

Together, thousands of children across the UK can learn that a small change can make a big difference.
